

FS2024

Current Topics in Geosciences (VV-Nr. 24210)

Mittwochs 16.15 bis ca 17.30 Uhr, Hörsaal 223, Bernoullianum

20. März

Dr. Cindy De Jonge, Assistant Professor, Earth Ecosystem Dynamics, Department of Earth Sciences, Swiss Federal Institute of Technology in Zurich (ETHZ)

Will this work in my backyard? Molecular fossils to reconstruct past temperature and ecosystem changes.

Host: Moritz Lehmann

17. April

Dr. Tomaso Bontognali, Research Associate, Space Exploration Institute, Neuchâtel

Title tba

Host: Nikolaus J. Kuhn

24. April

Prof. Olivier Evrard, Research Director, Laboratoire des Sciences du Climat et de l'Environnement, University Paris Saclay

Fallout radionuclides improve our understanding of sediment and contaminant transfers in river systems around the world?

Host: Christine Alewell

15. Mai

Dr. Manuel Chevalier, Postdoc, Institute for Geosciences, University of Bonn

Harnessing pollen record uncertainties to improve climate reconstructions in the tropics

Host: Oliver Heiri

22. Mai

Dr. Julie Lattaud, Research Associate, Aquatic and Isotope Biogeochemistry, University of Basel

tba

Host: Moritz Lehmann
